Art Unit: 1723

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-24, drawn to apparatuses, classified in class 210, subclass 168.
- II. Claims 30-35, drawn to a method, classified in class 210, subclass 767.

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process could be carried out by a materially different apparatus, for example, one including a common lid for covering upper sides the supply and return side filters and a pair of separate lower lids for covering lower sides of the supply and return side filters.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

This application contains four patently distinct species that correspond to the drawing Figures as follows:

<u>Species</u>	<u>Figures</u>
1	1-4, and 6
2	5
3	7-9
4	10.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Claims 1-9, 31, and 32 correspond to species 1 and 4;

Claims 10-18, 31, and 32 correspond to species 2;

Claims 19-29, and 35 correspond to species 3.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 30 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 1723

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew O Savage whose telephone number is 703-308-3854. The examiner can normally be reached on Monday-Friday, 6:00am-2:30pm.
